Re: Standard Scrap Metal/Chicago International Exporting
Site, Chicago, Illinois

Dear Mr. Lindland:

Chicago International has identified a project coordinator for the work to be performed under the February consent order. Mr. Rick Burgess, an employee of our client, will be that coordinator. He is very familiar with the site and the sampling program set out in the order. If you have any questions or concerns, please call.

A work plan will be submitted to you on Friday. We had hoped EPA would give our client a sample work plan. Steve Faryan said at our February 27, 1995 meeting that EPA could do this. Since our client has not received the work plan from EPA, a draft plan is now being drafted.

Sincerely yours,

Linda W. Tape
